Building, Ecology, Science and Technology Lecture Series †

Dear Colleagues:

Do not adjust your sets – technical difficulties originate with the network.

Delays in completing construction of public programming spaces at Daniels have stalled the launching of this year’s B.E.S.T. Lecture Series.

I am optimistic technical difficulties will be resolved by early 2018 and I shall then endeavour to coordinate an abbreviated lecture series on behalf of U of T architecture alumni and Toronto’s professional design community.

Thank you for all of your interest and my deepest gratitude to Tremco for all their support since 2010.

Stay tuned.

Collegially,

Professor Ted Kesik, Ph.D., P.Eng.
